Following these paragraphs, two images will show up, one below the other. If you pasted a 5" by 5" square cardboard hole on the screen of a 24-inch monitors/TVs, this is the difference you would see between an SD set and an HD set.

### **The difference between standard (SD) and high definition ...**

Thanks for a VERY useful site, Carlton, which I have used several times since HD TV sets came out some years back. Just replaced a 5 year old 50" plasma set (that developed a horizontal line) with another 51" plasma set, 720p, (\$399), same brand (it was easy to put all the connections in the same places and not have to use a different remote).

The graphics display resolution is the width and height dimension of an electronic visual display device, such as a computer monitor, in pixels. Certain combinations of width and height are standardized and typically given a name and an initialism that is descriptive of its dimensions. A higher display resolution in a display of the same size means that displayed photo or video content appears ...

### **Graphics display resolution - Wikipedia**

The logical NOT can be expressed through the 'not' keyword. The presence of the keyword 'not' at the beginning of the media query negates the result. I.e., if the media query had been true without the 'not' keyword it will become false, and vice versa. User agents that only support media types (as described in HTML4) will not recognize the 'not' keyword and the associated style ...
