It's not hard to write IO code in pure functional languages. They all provide a simple mechanism for writing IO code that works just like it does in imperative languages. All they do is enforce that you can't call IO code inside other code whose interface is declared as not performing IO. An analogy would be a dynamic language programmer complaining that a statically typed language like Java ...

Why functional languages? - Stack Overflow

Introduction. If climate change is the key process in the natural world impacting on sustainable development, then globalisation is the parallel process in the human world, creating both opportunities for, and barriers to, sustainable development.
