Structured Systems Analysis And Design

Structured analysis and design technique (SADT) is a systems engineering and software engineering methodology for describing systems as a hierarchy of functions. SADT is a structured analysis modelling language, which uses two types of diagrams: activity models and data models. It was developed in the late 1960s by Douglas T. Ross, and was formalized and published as IDEF0 in 1981.

1.. IntroductionThe literature in the area of performance management systems (PMSs) and management control systems (MCSs) increasingly recognises the need for research to be based on more coherent theoretical foundations (Chenhall, 2003, Covaleski et al., 2003). Researchers suggest that theory be used to contextualise findings and to provide a more systematic development of knowledge in the ...
