Classical physics refers to theories of physics that predate modern, more complete, or more widely applicable theories. If a currently accepted theory is considered to be modern, and its introduction represented a major paradigm shift, then the previous theories, or new theories based on the older paradigm, will often be referred to as belonging to the realm of "classical physics".

Whenever surfaces in contact slide relative to each other, they wear and emit particles. In a study published in Physical Review Materials and selected as an Editor's Suggestion, researchers from EPFL's Computional Solid Mechanics Laboratory (LSMS) investigate the influence of the adhesion between the contacting surfaces on the process of wear particle formation.

In order to develop Subsurface to serve its users in the best possible way, it's important to have user information. Upon launching Subsurface and using the software for a week or so, a one-box user survey pops up. It is entirely optional and the user controls what, if any, data are sent to the Subsurface development team. All data the user sends is useful, and will only be used to steer ...
