Social Learning Theory Albert Bandura
Social Learning Theory, theorized by Albert Bandura, posits that people learn from one another, via observation, imitation, and modeling. The theory has often been called a bridge between behaviorist and cognitive learning theories because it encompasses attention, memory, and motivation.

Social Learning Theory Bandura Social Learning Theory
Social Learning Theory is a theory of learning process and social behavior which proposes that new behaviors can be acquired by observing and imitating others. It states that learning is a cognitive process that takes place in a social context and can occur purely through observation or direct instruction, even in the absence of motor reproduction or direct reinforcement.

Social learning theory - Wikipedia
Because learning is so complex, there are many different psychological theories to explain how and why people learn. A psychologist named Albert Bandura proposed a social learning theory which suggests that observation, imitation, and modeling play a primary role in this process.
