In this study, we characterized PTMs of the AAV8 vector capsid using gel electrophoresis, mass spectrometry, and de novo structural modeling. We extended this analysis to encompass representatives from seven other clinically relevant AAV clades and found broad agreement in the pattern and extent of capsid deamidation.

In mathematics, a dynamical system is a system in which a function describes the time dependence of a point in a geometrical space.Examples include the mathematical models that describe the swinging of a clock pendulum, the flow of water in a pipe, and the number of fish each springtime in a lake.. At any given time, a dynamical system has a state given by a tuple of real numbers (a vector ...

Deep learning algorithms, in particular convolutional networks, have rapidly become a methodology of choice for analyzing medical images. This paper reviews the major deep learning concepts pertinent to medical image analysis and summarizes over 300 contributions to the field, most of which appeared in the last year.

Artwork by Mel Hunter (1959) As you probably already know, "strategy" refers to the science of successfully fighting an entire campaign or war, while "tactics" refers to the science of successfully fighting a single battle. Predictably some military strategy and tactics are general enough to apply to interplanetary combat, while others do not work at all in the space environment.

This course is a lead-in to deep learning and neural networks - it covers a popular and fundamental technique used in machine learning, data science and statistics: logistic regression. We cover the theory from the ground up: derivation of the solution, and applications to real-world problems. We show you how one might code their own logistic regression module in Python.
