Technology Toolbox: Inference for a population proportion on the TI-83/84. The TI-83/84 can be used to test a claim about a population proportion and to construct confidence intervals. Example 3: A coin that is balanced should come up heads half the time in the long run.

AP Statistics: Chapter 12: Inference for Proportions

We can use a procedure that mimics the test for a single mean with σ known from the lesson titled Inference for One Mean: Sigma Known (Hypothesis Test) to conduct a test for a single proportion. It is assumed that the true proportion of people who can taste PTC is 0.70. This is the

null hypothesis.

Lesson 17: Inference for One Proportion - BYU-I Statistics ...
If we draw repeated random samples of the same size, n, from some population and measure the proportion we get for each sample, then the collection of these proportions will pile up around the underlying population proportion, p, in such a way that a historgram of the sample proportions can be modeled by _____.
