Handling Data Worksheets - teachingimage.com

I have written my own Restful API and am wondering about the best way to deal with large amounts of records returned from the API. For example, if I use GET method to myapi.co.uk/messages/ this will bring back the XML for all message records, which in some cases could be 1000's. This makes using the API very sluggish.

One of the most popular question from data structures and algorithm mostly asked on a telephonic interview. Since many programmers know that, in order to find the length of a linked list we need to first traverse through the linked list till we find the last node, which is pointing to null, and then in second pass we can find a middle element by traversing only half of length.
