In computer science and in the part of artificial intelligence that deals with algorithms ("algorithmics"), problem solving includes techniques of algorithms, heuristics and root cause analysis.In these disciplines, problem solving is part of a larger process that encompasses problem determination, de-duplication, analysis, diagnosis, repair, and other steps.

Problem solving - Wikipedia
Brachistochrone Problem. Find the shape of the curve down which a bead sliding from rest and accelerated by gravity will slip (without friction) from one point to another in the least time. The term derives from the Greek (brachistos) "the shortest" and (chronos) "time, delay.". The brachistochrone problem was one of the earliest problems posed in the calculus of variations.

Bob Books is an interactive book app that uses spelling, repetition, and phonics to build beginning reading skills. Each 12-page book can be played at 4 different difficulty levels — beginning readers drag and drop letters to match words while the app sounds out the letters and reads the word aloud, more advanced readers select letters on their own.

Double-loop learning entails the modification of goals or decision-making rules in the light of experience. The first loop uses the goals or decision-making rules, the second loop enables their modification, hence "double-loop". Double-loop learning recognises that the way a problem is defined and solved can be a source of the problem. This type of learning can be useful in organizational ...
